

National Conference on Building Commissioning

MAY 18–20, 2015 | ST. LOUIS, MISSOURI

BCA Announces NCBC Keynote Presentation: Gateway to the Future of Commissioning – The Path that Lies Ahead

Keynote address by David Allen of McKinstry

PORTLAND, Ore., March 31, 2015—The Building Commissioning Association announced today that David Allen, Principal and Executive Vice President of McKinstry, will be the keynote speaker at the 2015 annual National Conference on Building Commissioning in St. Louis, MO. Mr. Allen’s presentation, “Buildings, Commissioning, and a Perspective on our Changing Market,” draws on deep experience and awareness of what’s happening in the building industry, the practice of commissioning, and what the future holds for the commissioning profession.

Today, more than ever, building commissioning is faced with innumerable pressures to do more with less, remove waste from construction and operations, regulate and standardize delivery processes, and train and certify those that practice commissioning. By reflecting on the current state of the built environment and sharing his thoughts on the future, Mr. Allen will share his vision of what the future has in store for commissioning professionals.

Mr. Allen is an active advocate for energy efficiency through the elimination of waste in the built environment. He serves on the boards of several industry associations, trade groups, and business alliances including executive member of the Washington Clean Technology Alliance and Economic Development Council of Seattle, chair of the Green Design/Building Skills panel for the Workforce Development Council of King County, and he is also on the Board of Trustees for the Rocky Mountain Institute.

About NCBC 2015: NCBC will be held in St. Louis, MO from May 18-20, 2015. This year’s theme is “Gateway to the Future of Commissioning.” Since 1993, NCBC has offered the premier annual event for leaders and newcomers across the building community to join together to learn and report on industry trends, cutting edge applications and quality education.

NCBC is designed to advance state-of-the-art building commissioning and the professionals who practice it. NCBC provides the forum for sharing the most cost-effective processes for optimizing building performance, reducing energy use, and improving indoor air quality, occupant comfort, and productivity.

About BCA

The Building Commissioning Association is dedicated to maximize the value of building commissioning to the built environment and its stakeholders. The BCA helps create, promote and provide leadership and education on current and evolving best practices in building commissioning for building owners, operators, designers, constructors and commissioning providers. www.bcxa.org.
